EDITOR'S DESK

The human beings face an unknown crisis. The children are at home. They don't get a chance to go to school. By this June month, children will be busy purchasing books, pen, geometry box, bags, shoes, clothes, and there will be crowd too in tailor shops. Busy will be their activity like wrapping books with covers, labeling and writing their names. These are given to you for imagination. Nothing has happened in the June 2020. All are at home playing with their siblings; new apps have been on the rise for children to play mobile games.

There are reports of corona death cases and recovery cases. Looking at the figures gives a rude shock to all of us. That too within our state and nearby our city gives us alarm. No sign of relief. Many countries have been announcing the invention of vaccines. The test procedures of it will make one year for common people to use. Scientists are working day and night for the remedy. The new way of treating corona cases are mouthpiece of the people now.

Book shops and stationaries usually by school children like a fruit swarmed by bees are no longer seen. The only thing visible to us when we come outside is deserted streets and closed shops. Places of worship are also closed. Pujas are being performed in closed doors. People can be seen with masks on their faces.

It is precarious situation; Technology is a boon to all of us. People irrespective of age started using online platforms. New terminologies like Zoom, Cisco Webex, Free conference call, google meet are heard everywhere. Slowly these apps are picking up. It has started reaching all sections of people. The uses of these apps have become familiar to many. Unrelented by this situation, our staff members are continuously organizing webinars for the welfare of students and teacher educators. As usual I deem it a privilege to bring all these activities on record.
